Braydon Hart

I make characters, objects and AI tools that people actually use.

Metro Detroit, MI · Open to remote · (586) 854-0844 · braydon@braydonhartai.com · Work: braydonhartai.com/work · github.com/Braydon2622 · LinkedIn

Selected work

01 **Gremlets** Desktop companion, 2026

68 original pixel creatures I designed that live on a Mac and show what Claude Code is doing: a thought cloud while it thinks, a lantern when it needs you, a flag in the moss when a task is done. I built the Swift app and its animation engine, browser and iPad versions, a Chrome extension, a two screen handoff and Claude Code hooks; 228 automated tests.

02 **Sales Call Cheat Code** Live AI call coach, 2026

Listens to a sales call and shows what to say next about 1.6 seconds after the client stops talking. Caught 92% of key moments on 25 unseen test calls; 141 automated tests.

03 **Sales Text Cheat Code** AI coach, 2026

Writes the right reply to any client text. All 9 reps on my team use it daily, saving each 30 minutes a day. Automated, it answers new client texts within a minute and flags every interested lead; it answered 180 real client texts in one week.

04 **Stitch Bench** AI embroidery design, 2026

An AI design team: a designer drafts, two AI reviewers critique, the designer revises, and the machine files are checked and stitched out on a real embroidery machine.

05 **Azoki Market** AI run store, 2026

A woven blanket store run by an AI crew I built: 12 products on Amazon, listings published through Printify, sales reported daily, and my approval on anything that spends money.

06 **Vinyl figure** Collectible toy, 2022

Took a character from my own sketch to a finished vinyl figure: designed the figure and its retail window box, worked with an overseas factory through samples and changes, and sold the run to collectors online.

07 **Blanket and tapestry shop** Textile design, 2022 to 2024

Designed original custom blankets and tapestries and built a profitable online shop around them.

What I work with

Make: character design, Blender, 3D printing, packaging design, embroidery files, working with factories

Build: Swift, JavaScript, TypeScript, HTML and CSS with Claude Code; Claude API, MCP, agents; n8n

Now building: small ESP32 objects with screens and lights, starting with a Gremlet lantern figure that lights up when Claude needs you

Teach and lead: run hands on AI trainings, rolled out AI tools to a 9 person team, hired and developed reps

Experience

MortgagePros, Director Troy, MI · 2024 to present

- Led 9 licensed loan officers to 434 closed loans and UWM Top 1% awards in 2024 and 2025; built and rolled out the AI tools above

MortgagePros, Loan Officer 2022 to 2024

- #1 closer company wide in 2023; 84 loans personally closed, $30.6M lifetime volume

Certifications and education

22 Anthropic Academy certificates (2026) · Google AI Essentials Specialization (2026) · Licensed Mortgage Loan Originator, NMLS #1925352 · Coursework, Macomb Community College
